Dear Hiring Manager,

My name is **Antonio Cazorla González**, and I am currently pursuing a Higher Vocational Diploma in Multiplatform Application Development (DAM) at CEAC FP in Spain. I am expected to graduate in June 2027.

I am writing to express my strong interest in joining your company as a Software Developer. My goal is not only to complete my mandatory internship as part of my studies, but also to begin my professional career in Switzerland and continue working within your company after graduation.

From the beginning of my studies, I have been particularly interested in backend software development using **Java** and **Spring Boot**. Alongside my academic training, I have developed practical knowledge of **Python, C#, JavaScript, HTML, CSS, PostgreSQL, MySQL, Docker, Git, GitHub, AWS, and Microsoft Azure**. I have also obtained the **Python Essentials certification from Cisco Networking Academy**, reinforcing my programming skills and problem-solving abilities.

Switzerland represents much more than a place to complete an internship. It is the country where I would like to build my future. I admire the Swiss commitment to innovation, quality, professionalism, and technological excellence. My ambition is to become part of this environment, continue learning from experienced engineers, and grow into a highly skilled software developer.

As part of my degree, I must complete a curricular internship. I would be delighted if I could carry out this internship within your company, allowing me to become familiar with your technologies, your development processes, and your corporate culture. My hope is that this internship could become the first step towards a long-term professional relationship after completing my studies.

I consider myself a responsible, curious, and committed person who enjoys learning new technologies and continuously improving. I enjoy working in teams, solving technical challenges, and taking on new responsibilities. I believe that determination, adaptability, and a strong work ethic are some of my greatest strengths.

I am a Spanish citizen and therefore a citizen of the European Union. I currently live in Valencia, Spain, but I am fully willing to relocate anywhere in Switzerland. Regarding languages, I speak **Spanish (native), English (C1), French (B1), German (A1), and Italian (A1)**. I am actively improving my German because I intend to integrate both professionally and personally into Swiss society.

I would be honoured to have the opportunity to contribute to your company, first as an intern and, if my work meets your expectations, to continue as a Junior Software Developer after my graduation. I am highly motivated to prove my abilities, learn from your team, and build a long-term career with your company.

Thank you very much for considering my application. I would greatly appreciate the opportunity to discuss how my motivation, technical background, and long-term commitment to Switzerland could benefit your team.

Yours faithfully,

Antonio Cazorla González
